

International Tourism Trends 2017

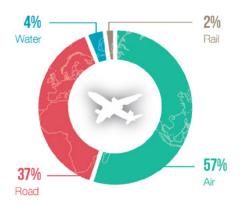

- Highest growth in international tourist arrivals in seven years since 2010
- Recovery of destinations suffering from security challenges in recent years
- · Economic upswing resulting in strong outbound demand from major source markets
- Strong recovery in demand from the emerging source markets of Brazil and the Russian Federation after few years of decline

WHY TOURISM MATTERS

Tourism is more than you imagine!

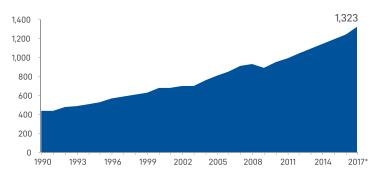

International Tourist Arrivals

Eighth consecutive year of sustained growth

Source: World Tourism Organization (UNWTO) ©

International tourist arrivals (million)

* = Provisional figure or data Source: World Tourism Organization (UNWTO) ©

International tourist arrivals, change by region, 2017 (%) 10 6.8 8.6 9 8.3 world average 8 7 5.6 6 4.6 5 4.0 4 3 2 1 Europe Asia and the Americas Africa Middle East Pacific

- International tourist arrivals grew 6.8% in 2017, the highest increase since the 2009 global economic crisis and well above UNWTO's longterm forecast of 3.8% per year for the period 2010 to 2020.
- A total of 1,323 million international tourist arrivals were recorded in destinations around the world, some 84 million more than in 2016.
- Results were driven by sustained travel demand for destinations across all world regions, including a firm recovery of those suffering from security challenges in recent years.
- Growth was fuelled by the global economic upswing, resulting in strong outbound demand from virtually all source markets.
- The recovery of outbound demand from Brazil and the Russian Federation after a few years of decline and the ongoing rise of India, also contributed to inbound growth in many destinations.
- By region, Africa and Europe grew above average.
- By subregion, North Africa and Southern and Mediterranean Europe led results in 2017, reflecting strong demand for destinations along the Mediterranean.

International Tourism Receipts

Tourism is the world's third largest export category

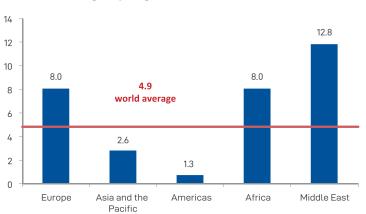

Total tourism exports (international tourism receipts + passenger transport services) (US\$ billion)

* = Provisional figure or data Source: World Tourism Organization (UNWTO) ©

International tourism receipts, change by region, 2017 (real terms, %)

- International tourism receipts increased 4.9% in real terms (adjusted for exchange rate fluctuations and inflation) to reach US\$ 1,340 billion in 2017.
- Strong outbound demand from both traditional and emerging markets fuelled growth in global receipts, which follows the positive trend recorded in international tourist arrivals (+7%).
- By region, the Middle East led growth in receipts, as some destinations rebounded strongly after weaker results in 2016.
- By subregion, growth was significant in South Asia and South-East Asia, as well as in Southern Mediterranean Europe and North Africa.
- In addition to the US\$ 1,340 billion in tourism receipts earned in the destinations (the travel item of the Balance of Payments), international tourism generated another US\$ 240 billion from international passenger transport services rendered to non-residents.
- Total exports from international tourism therefore reach US\$ 1.6 trillion, or US\$ 4 billion a day on average.
- As a worldwide export category, tourism ranks third after chemicals and fuels and ahead of automotive products. In many developing countries, tourism is the top export category.

(Data as collected by UNWTO August 2018)

World's Top Tourism Destinations

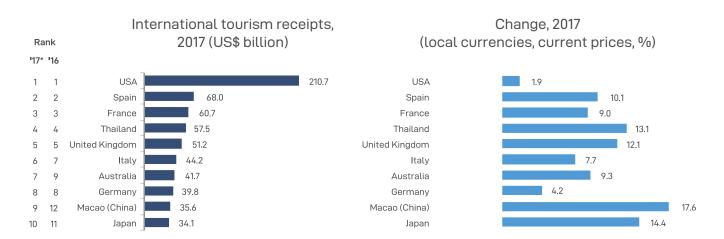

7 out of 10 top destinations are among the top in arrivals and receipts

- When ranking the world's top international tourism destinations, it is important to consider both international tourist arrivals and international tourism receipts.
- Seven out of the top ten destinations appear on both lists, despite showing marked differences in terms of the type of tourist they attract, as well as the average length of stay and spending per trip and the night.
- In 2017, four destinations moved up in the top ten ranking by international tourism receipts and three in the ranking by international tourist arrivals.

- Spain climbed from 3rd to 2nd place in arrivals and held on to 2nd position in receipts to become the world's second largest destination by both international tourist arrivals and receipts.
- Japan entered the top ten of receipts after six straight years of double-digit growth.
- The changes in the receipts ranking are partly the result of China moving down from 5th to 12th place owing to a revision in methodology.

^{* =} Provisional figure or data

^{* =} Provisional figure or data Source: World Tourism Organization (UNWTO) ©

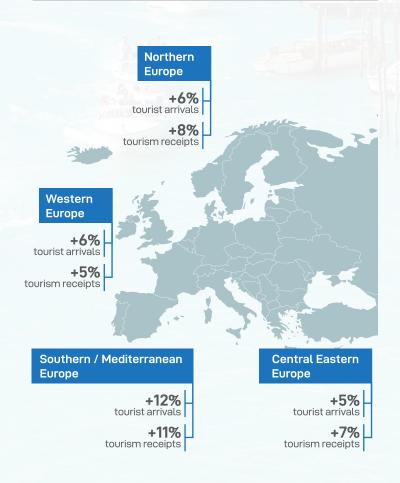

Note: Arrival data for the United States refers to 2016, while the growth rate refers to the first 9 months of 2017 only as data for full year is not yet available

Europe

Remarkable growth led by Southern Mediterranean destinations

- 2017 marks the eighth year in a row of sustained growth in Europe, the world's most visited region.
- Arrivals grew 8% in 2017, 52 million more than in the previous year.
- Growth in arrivals was mirrored by receipts which also increased 8%.
- Travel demand increased from virtually all Europe's source markets, both inside and outside the region, fuelling inbound growth across Europe. The recovery of the Russian outbound market in particular, benefitted many destinations.
- By subregion, Southern Mediterranean Europe led results in arrivals and receipts, driven by the recovery of Turkey and the continued strength of other traditional and emerging destinations. Italy and Spain reported an increase of six million arrivals each.
- In Western Europe, growth was led by top destination France and Belgium, recovering from the security incidents in previous years.
- Destinations in Central and Eastern
 Europe also posted solid growth
 with a few exceptions, thanks to
 increased outbound demand from
 Russia.
- All destinations in Northern Europe reported growth, including the United Kingdom, the subregion's largest destination, despite the terrorist attacks in London and Manchester. The depreciation of the British pound contributed to the UK's results, making the destination more affordable.

Asia and the Pacific

Continued growth fuelled by solid intraregional demand

International Tourist Arrivals 2017

323 Million

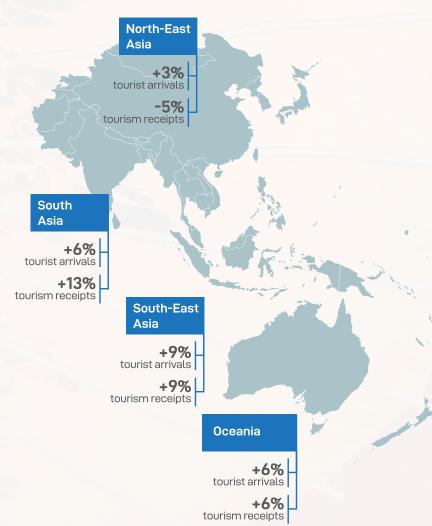

International Tourism Receipts 2017

US\$ 390 Billion

- Growth in Asia and the Pacific (+6%) reflects solid intraregional demand, particularly from China, the Republic of Korea and Australia.
- Growing purchasing power in emerging economy markets, increased air connectivity, more affordable travel and enhanced visa facilitation continue to fuel tourism from within and outside the region.
- Results in North-East Asia, the largest subregion in Asia, were positive overall. Solid growth was recorded in many destinations, led by Japan, which enjoyed its six straight year of doubledigit figures in arrivals. By contrast, the Republic of Korea suffered a decline, due to fewer arrivals from China.
- South-East Asia enjoyed the highest growth of all Asian subregions, with an additional nine million international tourists in 2017. Growth across destinations was fuelled by robust demand from North-East Asian source markets. Vietnam recorded the fastest growth in arrivals, while Thailand, the subregion's largest destinations, added three million more arrivals. Visa exemptions and improved air connectivity also contributed to the positive results.
- * Positive results in South Asia were largely driven by the strong performance of India, the subregion's largest destination, which benefited from increasing demand from western source markets and simpler visa procedures.
- Oceania reflect solid growth in Australia and New Zealand, fuelled by robust demand from North-East Asian source markets, the United States and the United Kingdom.

The Americas

Positive results across most destinations

- Arrivals to the Americas are estimated to have increased by 4% with receipts showing a slight slower growth.
- In South America, the growth momentum continued in 2017. Robust outbound travel from Argentina and the rebound of Brazil fuelled growth in neighbouring destinations. Double-digit growth in arrivals was recorded in Chile, Colombia, Ecuador, Paraguay and Uruguay.
- Central America recorded positive results in almost all destinations in terms of arrivals, led by Nicaragua, by also thanks to strong demand from regional markets.
- In the Caribbean, results were rather mixed, with some destinations recording robust growth such as the Dominican Republic and Jamaica, and others declines due to the strong hurricanes that affected many islands from mid-August through September 2017.
- North America, which accounts for two-thirds of the region's international arrivals and receipts, recorded slower growth in 2017.

International Tourist Arrivals 2017

209 Million

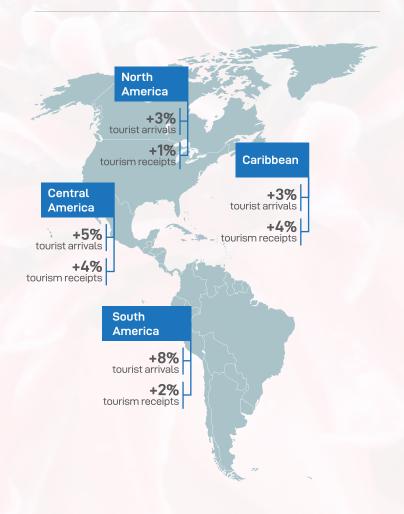

International Tourism Receipts 2017

US\$ 326 Billion

Africa

Strong recovery in North Africa drives regions' results

International Tourist Arrivals 2017

63 Million

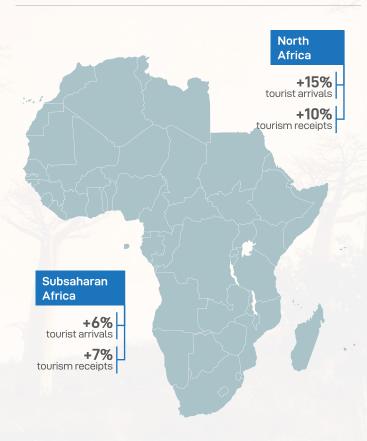

International Tourism Receipts 2017

US\$ 37 Billion

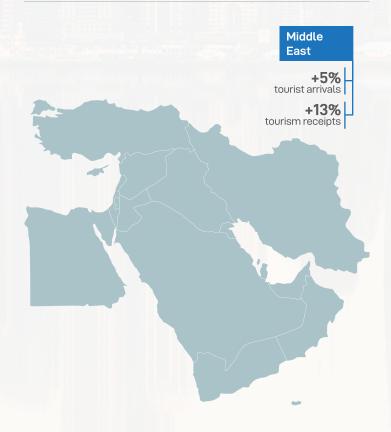

- International tourist arrivals in Africa are estimated to have increase by 9% and receipts at the same level (+8%).
- Results were driven by the continued recovery in North Africa and the solid growth in most destinations that reported data. Tunisia continued to rebound strongly in 2017 with a 23% growth in arrivals, while Morocco also enjoyed better results after weaker demand in the previous year. Growing demand from European source markets and a more stable environment contributed to the subregion's positive results.
- In Subsaharan Africa, strong performance continued in large destinations Kenya, Côte d'Ivoire, Mauritius and Zimbabwe. The subregion's top destination South Africa reported slower growth in arrivals though a strong increase in receipts. Island destinations Seychelles, Cabo Verde and Reunion; all reported double-digit growth in arrivals, benefiting from increased air connectivity.

Middle East

Rebounding from 2016 with a strong increase in income

- The Middle East showed signs of recovery in 2017 with a strong 13% increase in income generated by international tourism.
- Results were fairly mixed across destinations, with strong rebound in some and sustained growth in others, partly offset by a few destinations reporting declines.
- e Egypt led growth both in absolute and relative terms in arrivals, rebounding strongly from previous years. Visitor numbers rebounded from both traditional markets in Western Europe and emerging markets in Central and Eastern Europe, the Middle East and Asia. Promotional efforts and a return of confidence contributed to this recovery. Bahrain, Jordan and Palestine also rebounded robustly, while the United Arab Emirate of Dubai and Lebanon continued to grow at a sustained pace.

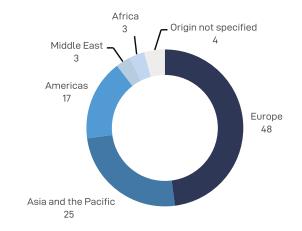

Outbound Tourism

4 of 5 tourists travel within their own region

Source: World Tourism Organization (UNWTO) ©

Outbound tourism, share by region of origin (%)

Source: World Tourism Organization (UNWTO) ©

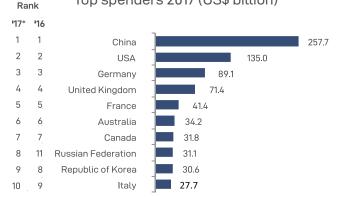

The large majority of international travel takes place within travellers' own regions (intraregional tourism).

- Traditionally, the advanced economies of Europe, the Americas and Asia and the Pacific have been the world's major source markets for international tourism.
- However, emerging economies in Asia, Central and Eastern Europe, the Middle East, Africa and Latin America have shown fast growth over recent years, driven by rising levels of disposable income.
- Europe still remains the world's largest source region for outbound tourism, generating almost half of the world's international arrivals.
- Meanwhile, the share of Asia and the Pacific has been increasing rapidly. Currently, one out of 4 trips originates in Asia and the Pacific.

Top spenders in international tourism

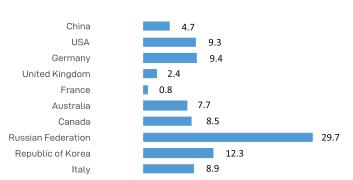

- China continues to lead global outbound travel in terms of expenditure.
- Tourism expenditure from the United States, the world's second largest source market, increased by US\$ 13 billion compared to 2016 (+9%), the largest increase in absolute terms among the top spenders.
- The Russian Federation rebounded strongly (+30%) after a few years of decline climbing three places to re-enter the top ten at number 8.
- All other source markets among the top ten recorded increases with particularly strong results in the Republic of Korea, Italy and Canada.

¹ Countries that could not be allocated to a specific region of origin. As information is derived from inbound tourism data this occurs when data on the country of origin is missing or when a category such as 'other countries of the world' is used grouping countries together that are not seperately specified.

(Data as collected by UNWTO August 2018)

Series of International Tourist Arrivals:

- TF = International tourist arrivals at frontiers (overnight visitors, i.e. excluding same-day visitors)
- VF = International visitors arrivals at frontiers (tourists and same-day visitors)
- THS = International tourists arrivals at hotel and similar establishments
- TCE = International tourists arrivals at collective tourism establishments
- TD = Departures of tourists (overnight visitors, i.e. excluding same-day visitors)
- VD = Departures of both overnight and same-day visitors
- = Provisional figure or data
 - = Figure or data not (yet) available
- I = Change of series

- n/a = Not applicable
 - = Decimal separator
- = Thousands separator

For individual countries and territories, information reflects data as reported by national or international institutions up until August 2018.

For the latest tourism data and trends, please refer to the UNWTO World Tourism Barometer at mkt.unwto.org/barometer. For tourism statistics online and for data on previous years, see the UNWTO e-library at www.e-unwto.org

For main concepts, definitions and classifications for the measurement of tourism, please see:

International Recommendations for Tourism Statistics 2008 (IRTS 2008) at statistics.unwto.org/content/irts-2008
